HCMC – ACE Life Insurance Co. has added new value to its products by increasing payouts in line with the growth of the inflation rate. To include this benefit in the main policy, policy holders need to pay an additional premium based on the face value of the main policy. The applicable inflation rate is capped within the range of 3% to 15%. For example, if the prevailing inflation rate is 17% a year, the insured rate will be 15%.
